Email: santosh.hargunani@gmail.com

Profile Summary

Technology Lead with 13+ years of experience in software engineering and team leadership. Experience in architecting and delivering large-scale software projects. Proficient in web technologies, with a passion for exploring emerging technologies. Strong track record of mentoring teams and enhancing productivity through effective leadership and strategic planning.

KEY SKILLS:

- **Technologies** : C#.Net, Asp.Net Core, Entity Framework Core, ADO.Net, LINQ, Kafka, RabbitMQ, Redis, SignalR, GRPC, Asp.Net, Kubernetes, Docker, MVC, SSIS, SSRS, SSAS, SQL-Server, Oracle, MySQL
- **Frontend Technologies** : HTML, CSS, Typescript, Javascript, AJAX, JQuery, React 16, Angular 6, Angular 8, Angular 12, Angular 14, NGRX, RxJS, CSS, HTML, Bootstrap, Kendo UI, AG-Grid, Angular Material, FPSpreads
- **Cloud Technologies** : Pivotal Cloud Foundry, Azure, Google Cloud (GCP)
- **Framework** : .Net Framework 2.0, .Net Framework 3.0, .Net Framework 4.5, .Net Framework 4.7, Asp.Net Core 3.1, Asp.Net Core 5, Asp.Net Core 6
- **Tools** : Visual Studio, Visual Studio Code, SQL-Server Management Studio, Splunk, Bitbucket, Jira, Bamboo, Harness, Confluence, SQL-Server Business Intelligence studio
- **Methodologies** : Agile, Waterfall

Professional Experience

Technology Lead

Charles Schwab - Austin, USA

Nov 18 - Present

- Collaborate with product managers and stakeholders to gather requirements and translate them into technical specifications.
- Map out the stories for the next sprint by carefully considering dependencies to enhance coordination and productivity
- Actively engaged in architectural discussions and decisions, facilitating the alignment of technical solutions with business strategies
- Lead the team of developers, providing guidance and support to achieve project milestones
- Developed Multi-Tier Architecture, Microservices using **ASP.Net Core, C#.Net, LINQ, Entity Framework Core, ADO.NET**
- Designed and implemented the UI frontend components and modules using **Angular, React, Typescript, Javascript, JQuery, CSS, Bootstrap, Kendo UI, AG Grid, NGRX, RxJS**
- Implemented design patterns like **Repository Pattern, Singleton Pattern, Dependency Injection** in ASP.Net Core application
- Used **BitBucket, GitHub** to maintain repositories, review pull requests and merge branches
- Used Harness as CI/CD pipeline tool to deploy the branches in cloud and VM instances
- Address and resolve technical issues that arise during project development
- Prepare detailed release documentation, participate in Definition of Done (DoD) meetings, and attend deployment calls.
- Research and evaluate new technologies and tools, recommending their adoption as needed.
- Assisted the offshore team in understanding requirements and resolving technical issues
- Prepare monthly and quarterly deliverable reports
- Part of resource management team

Consultant
Capgemini - Pune, India

Feb 2014 to Oct 2018

- Engaged in a range of projects within the Retail and Healthcare fields
- Collaborate with onsite team to understand and gather requirements
- Write, test, and deploy high-quality, scalable, and maintainable code
- Optimize performance by analyzing and improving existing code and algorithms.
- Propose and implement improvements to development processes and workflows
- Assist with the deployment process, ensuring that software is correctly released to production environments
- Assist in integrating APIs and third-party services, learning how to connect various components of an application
- Provide basic support for maintaining and troubleshooting legacy systems as needed
- Diagnose and resolve critical technical issues, providing effective solutions and strategies to mitigate risks
- Implemented N-Tier Architecture in applications using **ASP.NET MVC, Entity Framework and C# .NET**.
- Design database structure, write stored procedures, views, functions, cursors in **SQL-Server**
- Work closely with other teams (e.g., QA, UX/UI, Product Management) to deliver comprehensive solutions.
- Design reports using **SQL-Server Reporting Service (SSRS)**
- Design SQL-Packages using **SQL-Server Integration packages (SSIS)**

Software Developer
Softtech Engineers Pvt Ltd - Real Estate - Pune, India

Oct 2012 to Feb 2014

- Interact with project manager and understand functional and technical requirement
- Write clean, maintainable code according to project specifications and coding standards
- Identify and fix bugs in existing software, following best practices for debugging and testing
- Continuously learn new programming languages, frameworks, and technologies relevant to the team's projects
- Help build user interfaces, learning front-end technologies and frameworks under the guidance of senior developers
- Assist with database-related tasks, including writing simple queries and understanding data models
- Help maintain existing codebases by updating dependencies and improving performance
- Participate in feedback sessions with peers and seniors to discuss progress, challenges, and areas for improvement
- Design UI using HTML, Telerik Controls, Fpspread and Tree Grid controls in ASP.Net
- Design code behind layer in three tier architecture using **ASP.NET, C#.NET, ADO.NET** and Abstract Factory Pattern
- Design SQL-Server database objects like tables, stored procedures, views, cursors, functions etc.

Education

Bachelor of Engineering in Computer Technology from Nagpur University, India
